

My Younger Brother

Chapter 1

I didn't like him when my younger brother was born because he got most of the attention from our mom. My mom couldn't take care of two kids at the same time, so I was sent to my grandparents until I went to school.

Chapter 2

We often fought for toys when we were little. We also used to run out to play and forget to come back for dinner and we both got scolded by mom.

Chapter 3

My younger brother was very adorable. He was the one mostly taking care of the puppy and chicks in the family. Even the chicks listened to him. In the morning, he would let them go out to run around in the backyard; before dusk, he would call the chicks to come back.

Chapter 4

He didn't like math and science courses, but at that time parents used to believe that kids had to be good at math and science so that they could get a good job. My younger brother suffered from doing lots of homework.

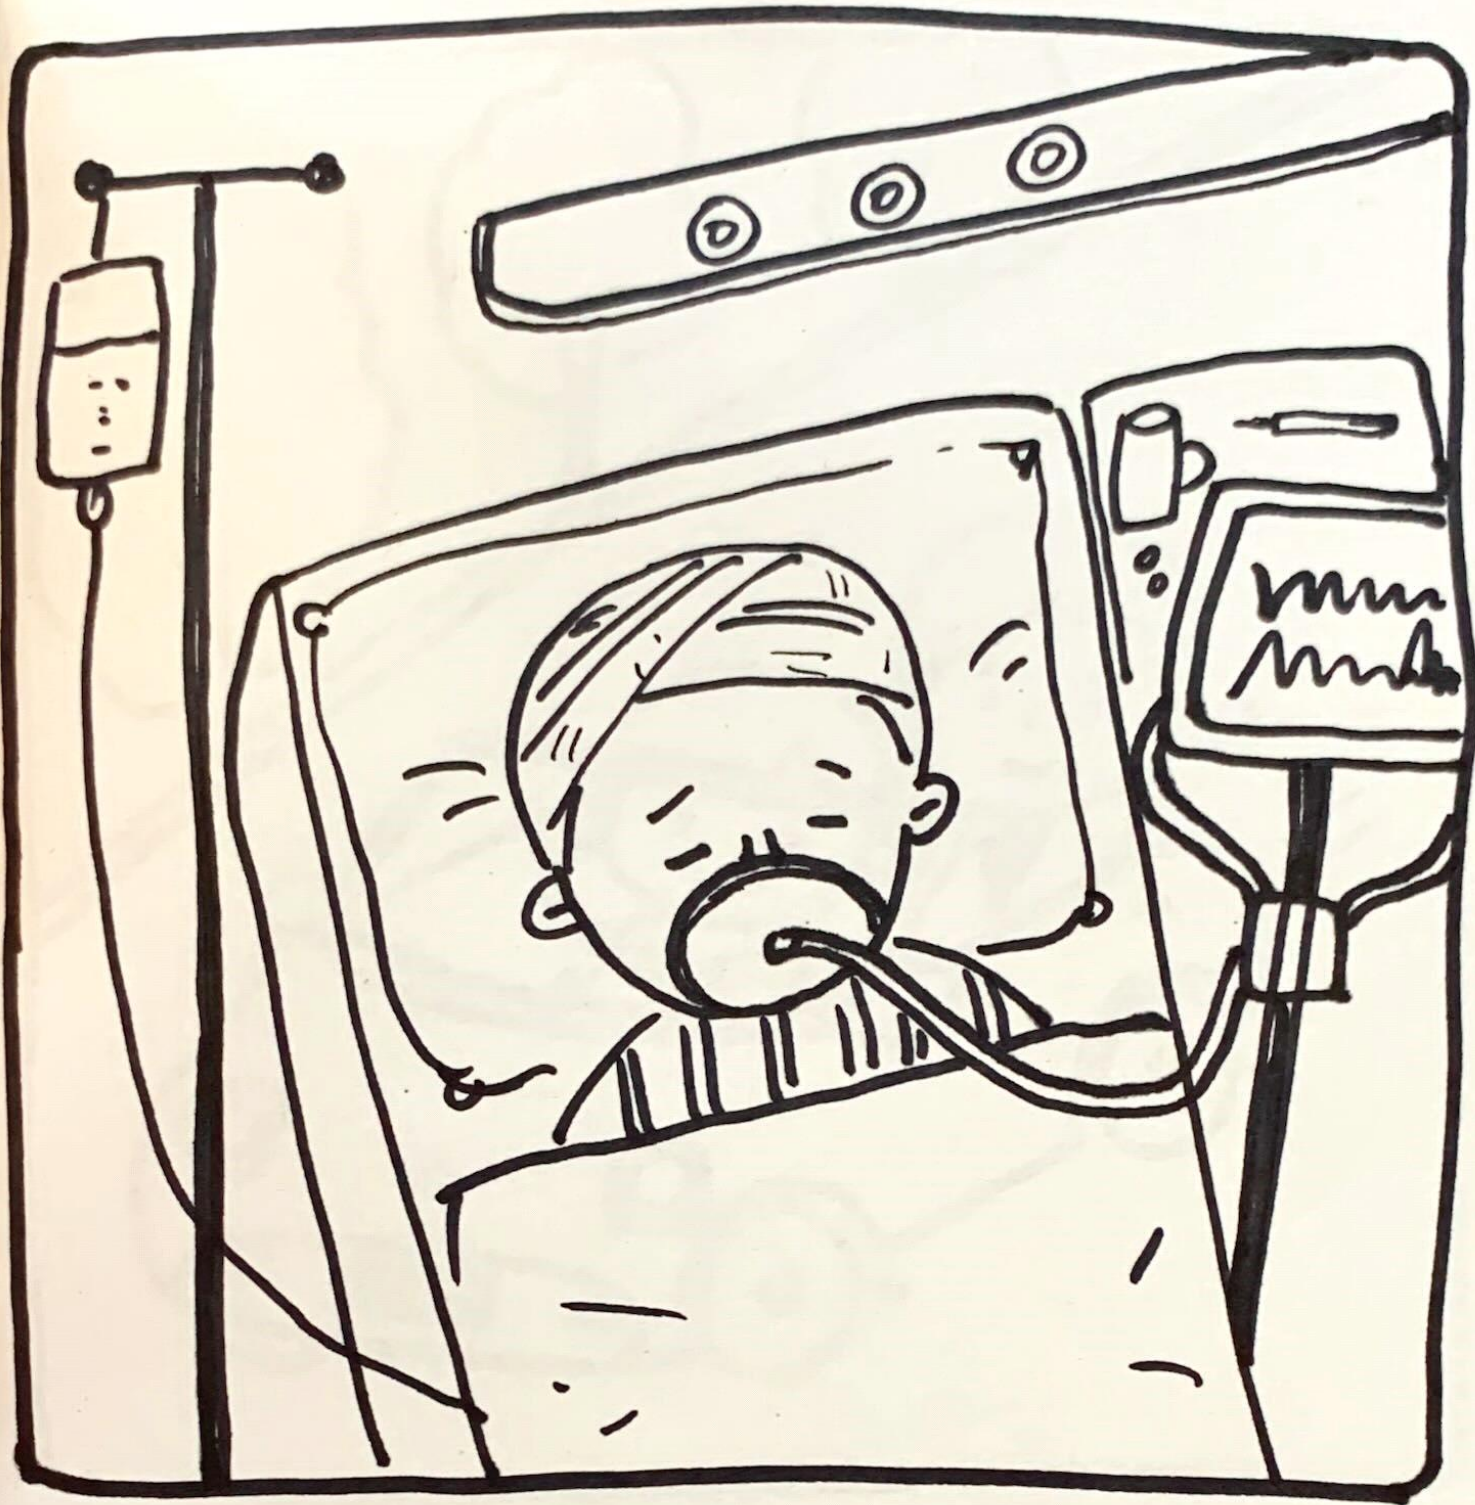

Chapter 5

My younger brother and I moved to and worked in a big city after we grew up. Our parents stayed in the hometown. We supported each other and spent the weekends together. We often went to concerts, climbed the mountains, and played badminton when we had free time. During those years we were very close.

Chapter 6

My younger brother quit his job and studied law. After three years of devoted study, he became a lawyer. He is willing to help others and treats every cases carefully, which makes his career more and more successful.

Chapter 7

Last year he was badly injured in an accident. I couldn't go back to see him because of the restrictions during the pandemic. I was very worried about him. The good news is that he is recovering very well.

Chapter 8

I hope things will be better soon. I am planning to go back to see him and our parents. I want to go and travel with them.
